SKILLS

Frontend

React, TypeScript, JavaScript, Redux, styled-components, Webpack

Backend

C#/.NET, MSSQL, Node.js, REST / WebSockets, Python / Django, PostgreSQL, MongoDB

Cloud & DevOps

Azure, AWS, CI/CD, Docker, Blue-green deploys, Git workflows, Linux

AI

Claude Code, Agentic workflows, Anthropic API

EDUCATION

AP, Computer Science
KEA, Københavns Erhvervsakademi, 2011 to 2014. Java and Android app development.

High school, Math & IT
HTX Frederiksberg, 2005 to 2009. Math and IT. Programming class with C++.

Thore Caspersen

Senior Developer · Frontend · Backend · Cloud · AI

Senior developer who loves building software for production: full stack, full ownership, powered by AI. 15+ years on the web, from freelance sites to a launched SaaS as lead developer, and six years on a regulated clinical-trial platform at Novo. A team player who shares knowledge and solves business problems in an agile workflow, so the team reaches its deadlines and goals. Self-explanatory clean code and automated tests keep quality high, even under GxP. Always learning new technology, and obsessed with Claude Code and agentic workflows.

EXPERIENCE

Senior Software Developer, Novo
Sep 2020 to Present
Søborg, Copenhagen

Senior full-stack developer on Azure and AWS: C#/.NET, MSSQL, Python, React and TypeScript, shipped through CI/CD.

- Helped rebuild nnexus, single sign-on for clinical-trial staff, around Veeva Vault
- Integrations in any shape, from SOAP to REST, under GxP

React.js Vue.js C#/.NET Python MSSQL REST SOAP Veeva Vault Microsoft Entra ID Azure Bicep AWS CI/CD Azure DevOps GitHub Playwright Pendo GxP

Software Developer, Planday
Aug 2018 to Aug 2020
Copenhagen

A workforce collaboration platform for managers and hourly workers. Helped move a legacy backend to microservices and built the first new standalone frontends.

- Extracted parts of a legacy backend into new microservices
- Built the first independent frontend applications on the new platform
- Co-built and expanded the shared React component library
- Code reviews and quality by default: strict PR approval, linting and test-coverage gates

React TypeScript Redux C#/.NET MSSQL Azure Microservices Domain-driven design CI/CD Jira

Lead Developer, Databoard

May 2017 to Aug 2018

Copenhagen

Built a real-time SaaS info-screen system from scratch as software architect, and took it to production within six months.

- Chose the stack and architecture: REST API plus websockets for real-time screens
- Runs on any screen through Raspberry Pi; ran AWS with EC2, ELB, S3 and CloudFront
- CI/CD with blue-green deployments

`JavaScript` `React` `Node.js` `MongoDB` `WebSockets` `AWS` `Raspberry Pi` `CI/CD`

Full-stack Developer, Unisport

Oct 2015 to Apr 2017

Copenhagen

Promoted from frontend to full-stack after eight months. Built webshop features end to end, from spec and estimate to backend and React.

- Built a custom boot size guide: database design, staff CMS, REST API and React UI
- Shipped weekly product-launch campaign sites with Nike and Adidas
- Translation system for 8 languages and a webpack-to-S3 deploy pipeline

`Python` `Django` `PostgreSQL` `React` `Redux` `Webpack` `AWS S3`

Full-stack Developer, AV-Nerds.dk

Apr 2015 to Sep 2015

Copenhagen

Built a knowledge-based recommendation engine that designs complete meeting-room AV setups.

- WooCommerce module with a custom recommendation algorithm
- Simple UI that turns room measurements into three complete solutions

`PHP` `JavaScript` `jQuery` `MySQL` `WordPress`

Web Developer, Freelance

2009 to 2015

Copenhagen

Websites for small businesses in hand-written HTML, CSS and JavaScript, plus custom WordPress themes.

- Vanilla HTML, CSS and JavaScript, no frameworks
- Custom WordPress templating in PHP, jQuery and CSS
